We Want to Be a Partner in EPA's
National Partnership for Environmental Priorities

IDENTIFYING INFORMATION

Name of Organization: CB Richard Ellis
Facility Name: MidAtlantic Division
Principal Contact: Mark Polhemus, Sr.
Title: Director of Engineering
Authorizing Official: _____
Title: _____
Address: 1055 Thomas Jefferson Street, Suite 600
City/State/Zip: Washington D.C. 20007
Phone/Fax: (202) 337-1025 / (202) 298-6621
Email: mark.polhemus@cbre.com
EPA RCRA ID Number: N/A
Date: April 5, 2006

PARTNER AGREEMENT

Our organization is choosing to become a partner in EPA's National Partnership for Environmental Priorities. Our goal is to reduce the quantity of one or more Priority Chemicals currently found in our products, processes, or releases using techniques such as source reduction, recycling, or other materials management practices. In this enrollment application, we identify one or more voluntary goals that we believe we can achieve as partners in this program. The voluntary goal(s) provided below is an initial estimate and may change over time. We may revise our goal(s) or withdraw from the program at any time. If/when we choose to revise our goals or withdraw from the program, we will notify EPA.

GOAL #1. Chemical Name: Mercury **CASRN:** 7439-97-6
Narrative description of proposed project: _____
Narrative description of proposed project: We plan to recycle mercury from spent fluorescent lamps. In the United States alone, CBRE represents over 249,000,000 square feet of commercial, retail, and industrial buildings, so our project will keep a significant number of spent lamps from ending up in our nation's landfills.

How we will measure success: We will measure success through electronic recordkeeping and reporting.

1a. Our voluntary **source reduction** goal for Chemical #1 is to reduce the amount of this chemical generated/used from a baseline amount of _____ pounds in _____ (month/year) to a reduced amount of _____ pounds generated/used by _____ (month/year).

1b. To accomplish this goal, we will use the following source reduction options (check all that apply):

_____ Equipment or technology modifications.
_____ Process or procedure modifications.
_____ Reformulation or redesign of products.
_____ Substitution of less toxic raw materials.
_____ Improvements in inventory control.
_____ Improvements in maintenance/housekeeping practices.

2a. In addition to, or in lieu of using source reduction methods, our voluntary **recycling or recovery** goal for Chemical # 1 is to increase the recycled or recovered quantity of this chemical from a baseline amount of 3 pounds in February, 2005 (month/ year) to an increased quantity of 233 pounds by December, 2008 (month/year).

2b. To accomplish this recycling or recovery goal, we will use the following options (check all that apply):

_____ Direct use/reuse in a process to make a product.
X Processing the waste to recover or regenerate a usable product.
_____ Using/reusing waste as a substitute for a commercial product.

Please use supplemental sheets for additional goals.
